

## Survey Technician – Monitoring Surveyor

Auckland, NZ

### The Company

---

With 20 years of experience around the world and 700 people operating out of 20 countries, SIXENSE provides risk mitigation solutions supported by high quality instrumentation and monitoring services. We detect, measure and model structural, geotechnical and environmental behaviours for owners and contractors.

Our edge is our ability to transform data into information.

Currently we are looking for a capable and independent individual for the positions of **Monitoring Surveyor or Survey Technician**. The successful applicant will be deployed in on a large infrastructure project in Auckland.

### Position:

---

This is a superb opportunity for an early career surveyor or survey technician who is looking to be learn about cutting edge survey monitoring techniques and a major infrastructure project in Auckland. The position will be in our Automated Survey Monitoring team and will involve both field and office work. Under direction and with support of the project manager, you will be responsible for installing robotic surveying instruments, managing data coming into our system and maintaining our survey network as a whole.

The ideal candidate must have:

- Trained surveyor with an educational background in surveying.
- Experience working on large construction projects is an advantage.
- High level of awareness of safety and understanding of safety procedures.
- Experience with robotic/automated Total Stations used on large infrastructure and understanding of least square adjustment theory.
- Strong ability to manipulate data in a variety of ways (including Excel and basic SQL) and aptitude/eagerness to learn new software.
- A basic level of understanding in electronics and computer networking.
- Ability to self-start and drive their own schedule.
- Proven ability to stick at problems and successfully troubleshoot.
- **Eligible to work unrestricted in New Zealand**

Whilst we have a large presence on the international stage, SIXENSE has only been in the New Zealand market for around 7 years and is currently experiencing high levels of growth. With this growth comes great opportunity for the successful candidate to have a real impact on our future. We are looking for someone who is willing to push this role beyond what is defined and add to our success. In turn we offer: high level autonomy; training in advanced automated data acquisition systems; and the potential to work internationally in the future.

Salary based on experience + benefits.
