

Instrumentation & Monitoring Projects Manager

Melbourne Australia

The Company

With 20 years of experience around the world and 700 people operating out of 20 countries, SIXENSE provides risk mitigation solutions supported by high quality instrumentation and monitoring services. We detect, measure and model structural, geotechnical and environmental behaviours for owners and contractors.

Our edge is our ability to transform data into information.

Position:

There is an open position for an INSTRUMENTATION & MONITORING PROJECTS MANAGER within our Melbourne office. The candidate will be a hands-on project manager with primary responsibility to manage the geotechnical instrumentation, deformation and environmental monitoring of a various sizes infrastructure projects in Victoria and NSW.

The candidate will manage a small team of engineers, technicians and surveyors, and report directly to the Managing Director. The position is a permanent one with potential further assignment(s) on major project in Australia, New Zealand or overseas.

Being part of a larger international group, Sixense environment brings outstanding career opportunities to skilled & motivated employees.

Key Responsibilities:

- Management of a portfolio of projects of various sizes.
- Day to day management of the team (3-10 persons)
- Liaise with the clients and site teams to meet project deadlines and objectives
- Manage and prioritize requests from the clients
- Plan new monitoring solutions at new project areas
- Maintain and troubleshoot current monitoring systems
- Installation of new systems on site
- Mentor junior members of the team
- Provide cost estimations for variations and new works
- Promote Sixense and follow new opportunities for growth

The ideal candidate should have:

- Excellent communication skills to deliver excellence in client care.
- At least 5 years experience in the geotechnical instrumentation & monitoring field
- At least 3 years experience managing staff
- High level of awareness of safety and understanding of safety procedures
- Ability to self-start and drive their own schedule
- Scheduling & negotiation skills
- Proficient in MS Office software suite
- Proven ability to stick at problems and successfully achieve outcomes.
- **Eligible to work unrestricted in Australia**
- **Australian driver's license**

Whilst we have a large presence on the international stage, SIXENSE has only been in the Australian market for around 7 years and is currently experiencing high levels of growth. With this growth comes great opportunity for the successful candidate to have a real impact on his future.

We are looking for someone who is willing to push this role beyond what is defined and add to our success. In turn we offer: high level autonomy; training in advanced automated data acquisition systems; and the potential to work internationally in the future.

Remuneration:

- Salary based on skill and experience
- Option to purchase shares at preferable rate.
