

I&M Project Manager

Melbourne, VIC

Our Company

With 20 years of experience around the world and 750 people operating out of 20 countries, SIXENSE provides advanced technologies & services to designers, builders and managers to optimise their assets through their life cycles.

One of our key services is risk mitigation solutions supported by high quality instrumentation and monitoring services. We detect, measure and model structural, geotechnical and environmental behaviours for owners and contractors.

We're also providing engineering and innovative, AI-based digital solutions for infrastructure inspection and asset management. Our edge is our ability to transform data into information.

Whilst we have a large presence on the international stage, SIXENSE has only been in the Australian and NZ market for few years and is a SME currently experiencing high levels of growth. With this growth comes exciting challenges and great opportunities for the successful candidate to have a real impact on his/her and our future.

The Sixense environment brings outstanding career opportunities for skilled & motivated employees either in Australia or abroad.

Position:

There is an open position for an experienced I&M PROJECT MANAGER, locally based in Melbourne and reporting directly to the Managing Director, to deliver projects and continue to drive the business forward in key markets.

This person's role will have a significant impact on the business and they will work in close partnership with the Managing Director, Technical & Operations Manager and back office in Melbourne. With a forthcoming change in the company structure, it is a path to a motivating career evolution for the successful candidate.

Role description & responsibilities

- Manage a portfolio of projects of various sizes with accountability for financial and technical performance.
- Manage, mentor and train engineers and technicians, as required.
- Manage aspects of business operations and office administration, as required.
- Liaise with the clients and site teams to meet project deadlines and objectives.
- Manage and prioritize requests from clients.
- Plan & install monitoring solutions.
- Provide a supporting role in business development, including maintenance of key client relationships, and development of new business leads.
- Provide a supporting role in the closing of new tenders, including providing key inputs for project estimation.
- With the support of other management staff, organise day-to-day operations to ensure safety, technical and financial performances.

Skills and experience required

- At least 5 years successful experience in managing projects and/or operations while delivering technical solutions in the construction/infrastructure industry.
- At least 5 years successful experience in the instrumentation & monitoring field.
- Excellent communication skills to deliver excellence in client care.
- Strong entrepreneurship mind set.
- Curious and eager to learn and launch new technologies and services.
- A strong sense of priority, commitment and accountability.
- Experience working on large construction projects is an advantage.
- High level of awareness of safety and understanding of safety procedures.
- Resilient and ability to work under pressure.
- Skilled in use of MS Office suite.
- Proven ability to stick at problems and successfully achieve outcomes.
- Bachelor of Engineering or Science or related degree.
- Unrestricted rights to work in Australia (mandatory)

What we can offer you

- Strong team culture with collaboration opportunities within Australia, NZ and international business units
- Flexible and autonomous work environment, we'll support you to think differently and encourage innovation
- Company shares purchase plan with attractive free shares incentives
- Fitness incentive scheme for reimbursement of regular gym/sporting activity
- Paid parental leave
- Career advanced opportunities within the broader Vinci network.
- Performance based annual bonus

Remuneration

- Salary based on experience + benefits
